

## skinfit® Klima.soft

### Extremely soft underwear

Outdoor athletes demand a lot from functional underwear. It has to be fast-drying, elastic, and feel good on your skin. Top it off with sophisticated odour-neutralization and you've got Klima.soft. The secret behind Klima.soft is a composite fabric fiber made from Meryl Skinlife and Meryl Nexten. Together Skinlife and Nexten team up to effectively neutralise odour, keep you dry, and maintain a comfortable body temperature. The Skinlife fibre is made with microscopic silver ions, which maintain your body's optimum natural Ph-balance while reducing bacteria growth (which causes bad odour). The Nexten fibre is hollow in structure so moisture can't cling to the fabric, thus facilitating quick evaporation. This efficient capillary action not only transports moisture away from your body, it also regulates body temperature, making Klima.soft lightweight underwear ideal in hot temperatures or for everyday comfort.

- soft and comfortable
- fast-drying
- temperature-regulating hollow fibre
- integrated silver ions prevent bacteria growth and odour
- ideal for hot temperatures
- flat seams
